## Projects

---

**Simple MVC**

[gitnjole/simple-mvc](https://github.com/gitnjole/simple-mvc)

- Lightweight custom PHP framework, inspired by Laravel, aimed at providing a solid foundation for web application development and primarily utilized for educational purposes
- Implemented essential features such as MVC architecture, clean routing, database support for MySQL, template and layout engine, middleware support, and comprehensive error handling for debugging

**Lara Jobs**

[gitnjole/lara-jobs](https://github.com/gitnjole/lara-jobs)

- Developed a job posting board using Laravel framework and MySQL database, enabling users to create and browse job listings seamlessly
- Implemented necessary features like user authentication, the ability to publish jobs, an admin panel, and user-friendly browsing and filtering options, all the while keeping future improvements in mind

**E-charge tracker**

[gitnjole/e-charge-tracker](https://github.com/gitnjole/e-charge-tracker)

- Currently in ongoing development, a Laravel application to track and manage electric vehicle charging card information, providing insights into balance and transaction history.
- Implemented a REST API endpoint to enable programmatic retrieval of charging card details, facilitating integration with external systems.

## About me

---

Dynamic and committed junior PHP developer with a solid background in computer science. I enjoy making things from scratch and am constantly looking to learn and grow.
